---

This will serve as a clarification regarding the information to be provided in response to the 5 items on page 3 of the RFP.

More specifically, in addition to what bidders may otherwise plan to include:

Bidders shall identify any design or survey items that are not going to be self-performed.  
Bidders shall include a list, brief description and client contact information of similar projects for which they have been the engineering and design firm of record.  
Bidders shall identify their proposed staffing.  
Bidders shall list the estimated hours for each of the tasks in their proposal.  
Bidders shall include suggestions for submittal and review milestones.

Bidders shall acknowledge and include this as Addendum 2 in their proposals, and must acknowledge receipt of this email.
